

Your Platform & FDE Partner for Successful AX

# QueryPie AIP

# Our Journey: Raised \$30M+ in Total Funding

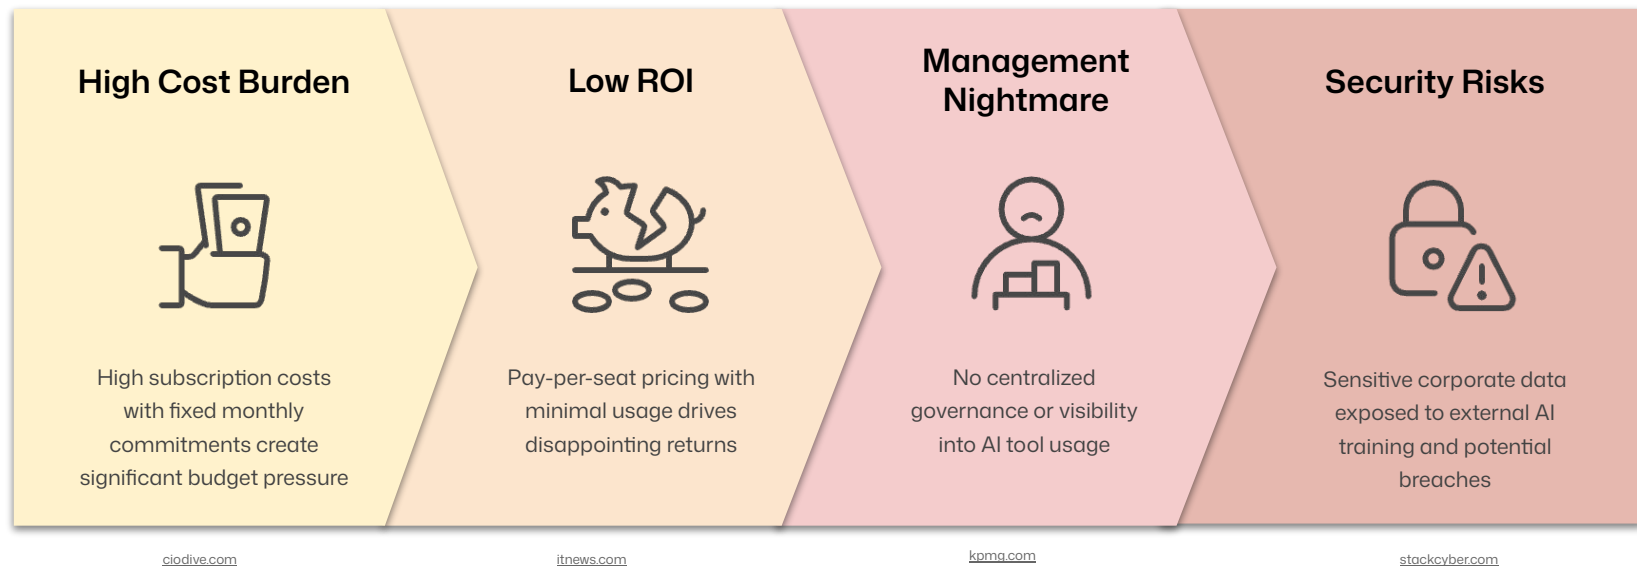

QueryPie **AI**

Your Partner in Driving  
Successful **AI Transformation**(AX)

# Enterprise AI Adoption: Expectations vs. Reality

While enterprises recognize generative AI's transformative potential, implementation reveals a significant gap between expectations and reality.

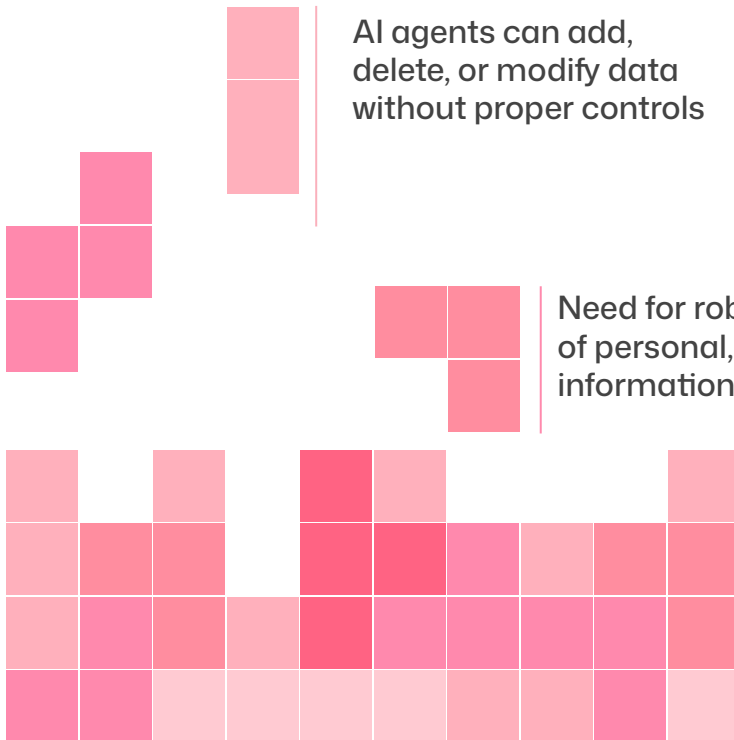

# AI Data Handling Challenges

AI becomes more powerful with more data—and simultaneously more dangerous. Solving this paradox is essential for enterprise AI success.

Lack of clear policies on  
what data AI can and cannot  
use

AI agents can add,  
delete, or modify data  
without proper controls

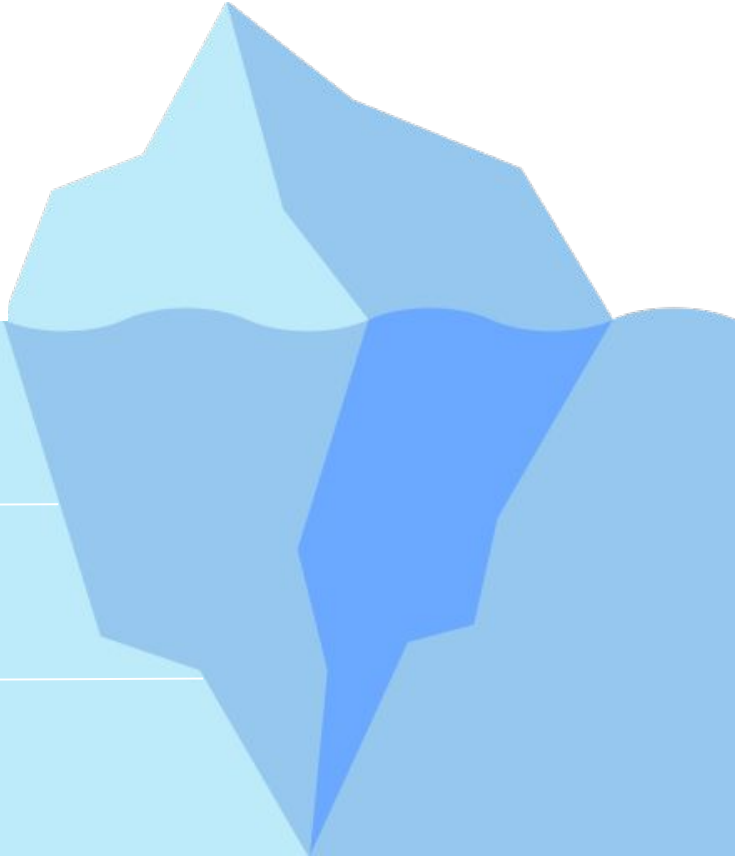

Need for robust filtering and masking  
of personal, customer, and confidential  
information

# AI Data Management Challenges

Organizations chase AI transformation but drown in data governance complexity, leading to poor ROI and abandoned initiatives—an endless cycle of failed investments.

## Why AI Initiatives Stall at the Starting Line

1

Instead of using existing data sources, teams create separate **duplicate datasets** for AI—doubling infrastructure costs and complexity

2

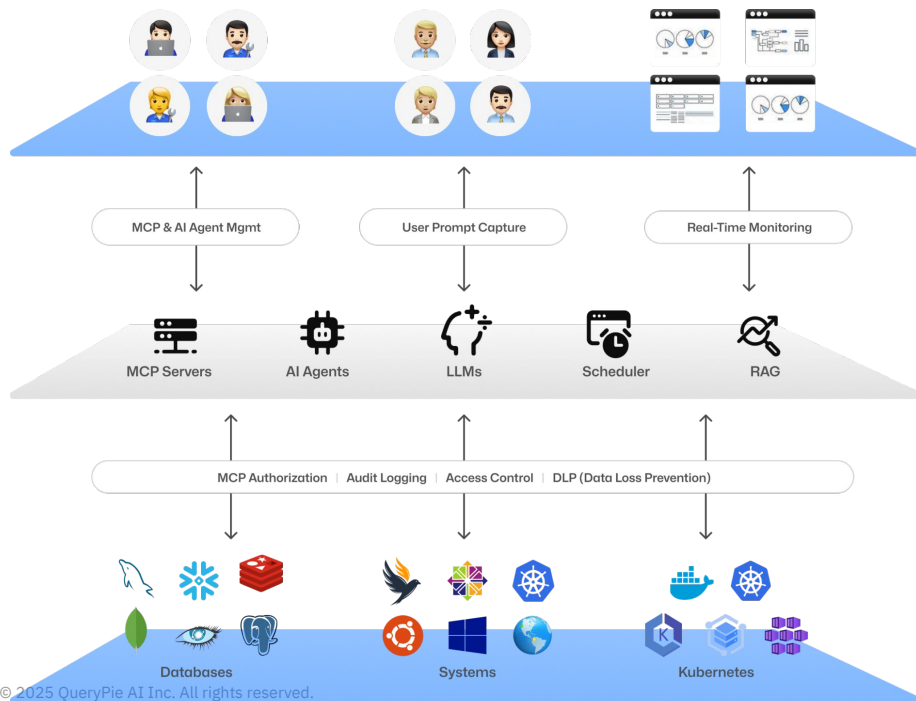

Original and replicated data sources fall out of sync, **creating inconsistencies** that undermine AI reliability

3

Months disappear into **data cleanup efforts** while AI initiatives remain frozen

# How QueryPie Turns AI Challenges Into AI Success

Where data security and complexity killed AI projects, QueryPie delivers success. Our integrated ACP and AIP platforms eliminate adoption barriers, while FDEs partner with your team to build secure, powerful, customized AI environments.

## WAC (Web Access Controller)

### • End User Web AI Service Access Control & Audit

- User-LLM Prompt Activity Monitoring
- Session Recording & Behavior Analysis

## AIP (AI Platform)

### • MCP, AI Agent Host & Client

- MCP & AI Agent Hub (Marketplace)
- Edge Tunneling & Proxy Support for Local MCPs
- MCP Access Control & Audit
- DLP (Data Loss Prevention)

## ACP (Access Control Platform)

### • Data / Infrastructure Access Control & Audit

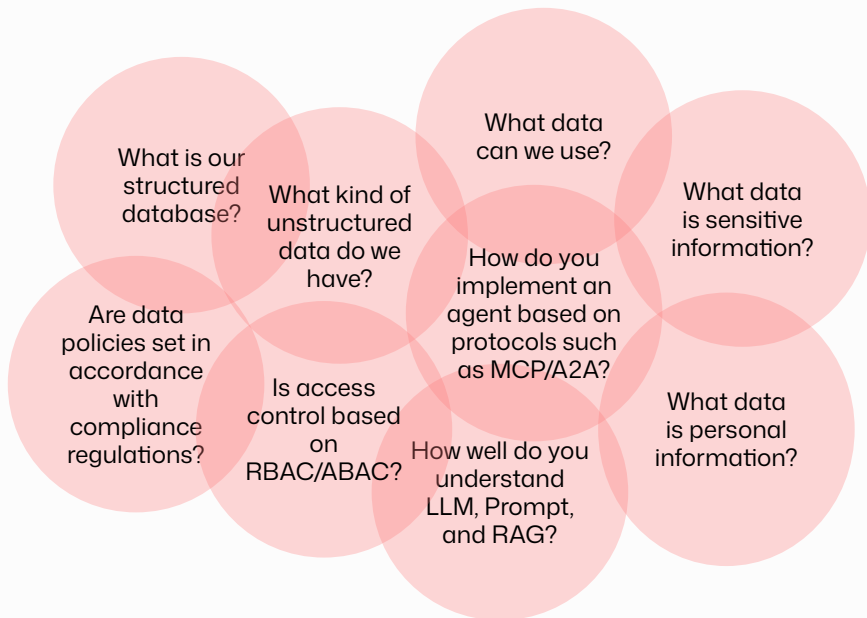

- Privacy / Confidential Data Protection
- Access Request and Approval Workflows

# Transform to AI, Keep Everything Else

Transform your business with AI without infrastructure changes, security compromises, or data disruption - the only platform that enables real-time AI Agent interactions while preserving your current IT ecosystem.

## Reality of AI Transformation

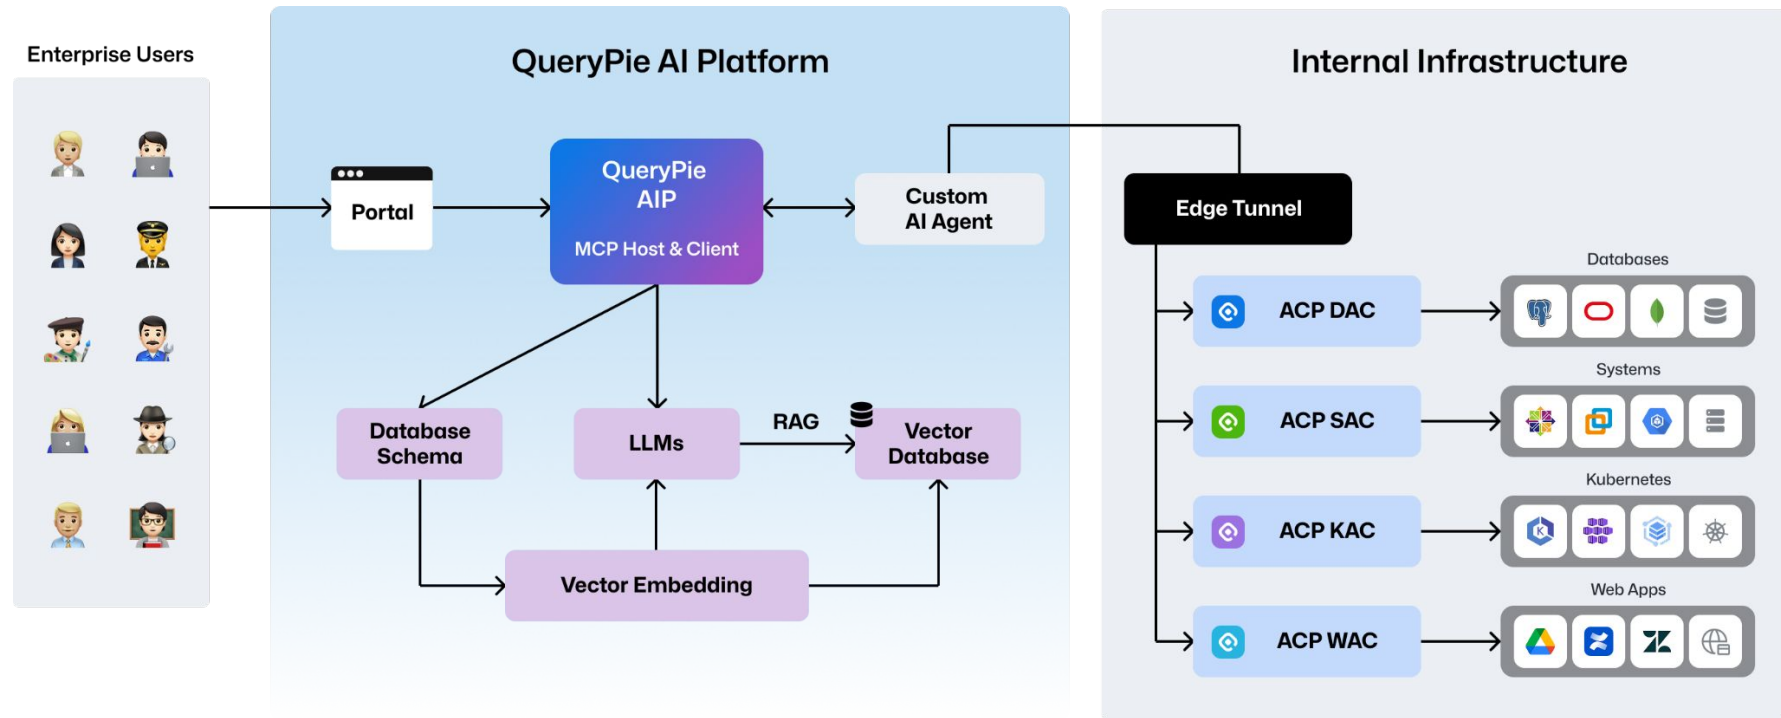

## But with QueryPie, you can

- ✓ **Keep** your current infrastructure
- ✓ **Maintain** your security standards
- ✓ **Add** AI capabilities seamlessly
- ✓ **Get** instant results

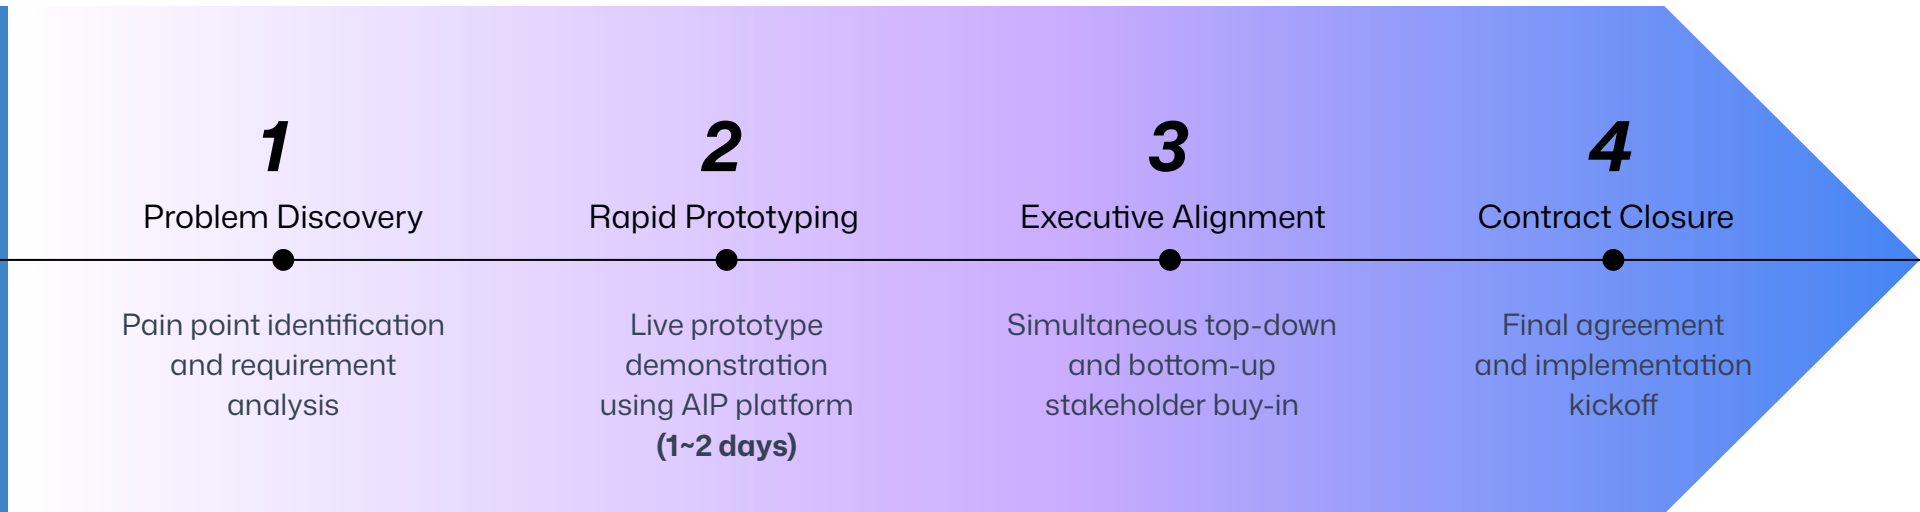

# Build AI Agents That Connect With Your Existing Infrastructure

Leverage ACP (Access Control Platform) to safely connect AI agents with relational databases, data warehouses, NoSQL, AWS EC2, Kubernetes, and diverse IT infrastructure—without changes.

# QueryPie AI as a Service: Forward Deployed Engineer (FDE) Service

Forward Deployed Engineers (FDE) embedded in your organization deliver comprehensive AI transformation—from strategy and development to production operations, ensuring your AI initiatives succeed.

Full process completed in **2** months

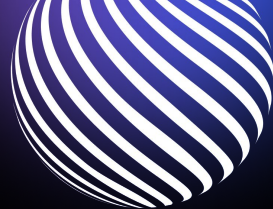

# QueryPie AI as a Service: Usage-based Enterprise LLM

Browser-based platform with instant access—no downloads, no setup, no fixed costs.

Up to 90% savings vs. ChatGPT makes enterprise-wide AI adoption finally achievable.

|                                        |  ChatGPT                                                              |  Copilot            |  Claude |  perplexity |  QueryPie                                                                                                                                                                                                                                                                                                                                                |

# Google Calendar, Slack

Link Google Calendar and Slack, and your schedule gets automatically organized and sent to Slack – no manual work needed.

Stay on top of critical events with smart, streamlined schedule management – accessible anywhere, anytime.

Check my Google Calendar and summarize my schedule for this week.

## 이번주 일정 요약

Google Calendar에서 이번주 일정을 확인해보겠습니다.

아래와 같은 일정이 확인됩니다:

### ★ 월요일 (9/15)

- 10:00-11:00 | 팀 주간 미팅 (Paris 회의실)
- 14:00-15:00 | 프로젝트 기획 리뷰

### ★ 화요일 (9/16)

- 09:30-10:00 | 1:1 미팅 (Sam)
- 17:00-18:00 | 제품 데모 준비

### ★ 수요일 (9/17)

- 11:00-12:00 | 마케팅 전략 회의
- 15:00-16:00 | 디자인 리뷰

### ★ 목요일 (9/18)

- 09:00-09:30 | 데일리 스탠드업
- 16:00-17:00 | 파트너사 협업 미팅

Ask with @Slack

## scenario 2

## Google Sheet

Simply snap a photo of any business card, and AI will extract and organize the details directly into Google Sheets.

Say goodbye to manual typing. One click transforms your business cards into an organized contact database.

Take these business cards and organize them into a new Google Sheet named 'BizCard.'

The screenshot shows a Google Sheet titled 'BizCard' with a table containing the following data:

|    | A   | B                        | C               | D            | E             | F                         | G                       |
|----|-----|--------------------------|-----------------|--------------|---------------|---------------------------|-------------------------|
| 1  | 이름  | 직책                       | 회사              | 전화번호         | 핸드폰           | 이메일                       | 주소                      |
| 2  | 정현진 | Sales Representative     | BIOMED CARE     | 02-1234-5678 | 010-9876-5432 | hj.jeong@biomedcare.co.kr | 서울특별시 서초구 나길 45, 3층     |
| 3  | 김지훈 | Enterprise Sales Manager | SECURENET KOREA | 02-3456-7890 | 010-2345-6789 | jihun.kim@securnet.co.kr  | 서울특별시 강남구 테헤란로 231, 10층 |
| 4  |     |                          |                 |              |               |                           |                         |
| 5  |     |                          |                 |              |               |                           |                         |
| 6  |     |                          |                 |              |               |                           |                         |
| 7  |     |                          |                 |              |               |                           |                         |
| 8  |     |                          |                 |              |               |                           |                         |

<Google Sheets 'BizCard'>

명함에서 정보를 추출하여 Google Sheets에 'BizCard'라는 이름의 새로운 스프레드시트를 만들어서 정리해드리겠습니다.

먼저 두 명함의 정보를 정리하면:

명함 1 - BIOMED CARE

Ask with @Google Sheets

@ Google Sheets claude-4-sonnet

# Create AI Agents | Your Personal AI Assistant

Go beyond chat-based tools – create AI agents that act as true colleagues, capable of handling your tasks from start to finish.

Deploy pre-built AI agents based on curated use cases, or easily create your own custom agent from scratch.

The screenshot displays the 'Agent Library' interface, which allows users to discover and install AI agents. The main view shows a grid of agent cards, each representing a different AI-powered tool. Two detailed pop-up windows are shown, providing more information about specific agents.

**Agent Library Overview**

Discover and install AI agents for your needs

**Categories**

- All Agents
- Analytics
- DevTools
- Productivity
- Searching
- Security

**Search agents...**

**AI Agents**

- Customer Support Specialist**  
AI-powered 24/7 customer service expert ensuring seamless support.
- Inventory Manager**  
Automated expert in inventory tracking and stock management.
- Business Card Manager**  
명함 이미지를 업로드하면 자동으로 Google Sheets에 저장됩니다.
- QueryPie DAC Agent**  
Access databases and execute queries securely and efficiently.
- QueryPie SAC Agent**  
Connect to servers, perform management tasks, and monitor server health.
- QueryPie KAC Agent**  
Manage Kubernetes clusters and automate container orchestration.

**Customer Support Specialist Details**

**Categories**: AI

**Integrations**: Zendesk, Slack, Salesforce

**Resources**

**Overview**  
AI-powered 24/7 customer service expert ensuring seamless support.  
고객 지원 전문가로서 24/7 고객 서비스를 제공하는 고급 AI 에이전트입니다. 이 지능형 에이전트는 기업이 높은 고객 만족도를 유지하면서 지원 비용을 줄일 수 있도록 도와줍니다.  
우리의 AI 에이전트는 고객 문의 처리, 기술적 문제 해결, 정확한 제품 정보 제공에 뛰어납니다. 기존 지원 시스템과 원활하게 통합되며, 필요시 복잡한 문제를 인간 전문가에게 에스컬레이션할 수 있습니다.

**Features**

- 24/7 고객 지원
- 티켓 관리
- 감정 분석

**Use Cases**

- 제품 기능에 대한 고객 문의
- 주요 장애 및 배송 정보 지원
- 일반적인 문제에 대한 기술 지원
- 반응 및 응답 시간 최적화

**Business Card Manager Details**

**Categories**: Productivity

**Integrations**: Google Sheets

**Resources**

**Overview**  
명함 이미지를 업로드하면 자동으로 정보를 추출하고 Google Spreadsheet에 저장해주는 에이전트입니다.  
비즈니스 카드 이미지를 명함 정보를 자동으로 추출하고 관리하는 전문 AI 에이전트입니다. 이 지능형 시스템은 고급 OCR 기술을 사용하여 업로드된 명함 이미지에서 연락처 정보를 정확하게 추출하고 효율적으로 구조화합니다.  
우리의 AI 에이전트는 다양한 카드 레이아웃과 디자인을 유연하게 처리하며, 여러 카드를 동시에 처리하고 Google Sheets와 원활하게 통합하여 쉬운 데이터 관리 및 공유를 제공합니다.

**Features**

- OCR 기술을 이용한 텍스트 추출
- Google Spreadsheet 자동 저장
- 정확도 높은 정보 추출
- 다양한 명함 레이아웃 지원
- 명함 이미지 일괄 처리
- 중복 정보 자동 감지

**Use Cases**

- 컨퍼런스에서 수집한 명함들을 일괄 디지털화
- 영업팀의 명함 정보를 CRM에 자동 입력
- 네트워킹 이벤트 후 연락처 정리
- 명함 정보를 검색 가능한 데이터베이스로 구축

# RAG Support | AI That Knows Your Business Inside and Out

Train AI assistants on your internal documents to create specialized helpers that understand your company's unique operations.

Real-time information updates and hallucination prevention ensure your AI delivers accurate, trustworthy results every time.

### Knowledge Bundles

Create and manage Knowledge Bundles for RAG. Each bundle can include files, Google Drive, and more.

| Name                  | Description                                     |
|-----------------------|-------------------------------------------------|
| Product Docs Bundle   | Product documentation and release notes         |
| HR Policies Bundle    | HR policies, guidelines, and forms              |
| Sales Playbook Bundle | Sales playbook, scripts, and objection handling |

### Bundle Details

[+ Add Source](#) [More Actions](#)

#### Sample Knowledge Bundle

Connect to various knowledge sources and databases for AI-powered insights

**RAG Service**  
AWS Bedrock

**Bundle Status**  
INDEXED

#### Knowledge Sources (4)

| Type         | Knowledge Name        | Chunks | Chars   | Status   | Actions |
|--------------|-----------------------|--------|---------|----------|---------|
| File         | jira.csv              | 102    | 157,055 | Indexed  | ...     |
| File         | AI 에이전트 플랫폼 비교 분석.pdf | 13     | 18,618  | Indexed  | ...     |
| Google Drive | 마케팅 전략 문서             | 45     | 67,890  | Indexing | ...     |
| Notion       | 프로젝트 관리 페이지           | 28     | 34,521  | Failed   | ...     |

# Agent Scheduling | Automate Routine Tasks Without Manual Input

Move beyond AI that only responds to instructions – configure agents to execute recurring tasks automatically, without any manual prompting. Schedule agent tasks to run automatically at regular intervals for seamless, hands-free execution.

# Mobile Support | The Same AI Experience on Any Device

Our web-based platform ensures a consistent AI experience across mobile and desktop devices.

# Audit & Monitoring | Track Every AI Action with Enterprise-Grade Precision

Every AI action is logged in detail, ensuring compliance with regulatory requirements and enabling robust security monitoring.

Detailed per-user logs make audits straightforward – whether internal or external – and help you quickly identify what went wrong during security incidents.

# DLP Support | Prevent Sensitive Information Leakage During AI Use

Built-in DLP (Data Loss Prevention) safeguards prevent accidental exposure of sensitive information like credit card numbers, SSNs, and API keys during AI interactions. Sensitive information is automatically detected and blocked throughout all AI interactions, preventing unintentional data leakage before it happens.

## Data Loss Prevention

Monitor and prevent sensitive data breaches
